ক. **হোমোসেক্সুয়ালিটি:-** এমন একটি প্রবৃত্তি যেখানে সুখ-দুঃখ, ভালোবাসা ও যন্ত্রণা দুটি ছেলে বা দুটি মেয়ের মধ্যে হতে পারে না, তাদের হোমোসেক্সুয়াল বলা হয়। তবে হোমোসেক্সুয়ালিটির অনেক আরও অনেক অর্থ রয়েছে যেমন সমকামিতা ইত্যাদি।

খ. **হোমোসেক্সুয়ালিটির বৈশিষ্ট্য গুলি এল:-**

(১) হোমোসেক্সুয়ালিটির প্রবৃত্তি খুব কম চরিত্রে দেখা যায়।

(২) হোমোসেক্সুয়ালিটির প্রবৃত্তি চরিত্রটি সবসময় একা থাকে, কারুকে নিয়ে তৈরি ভালবাসা খুবই অসম্ভব হয়।

এই সংজ্ঞা কি?

(৩) হোমোসেক্সুয়ালিটি একটি মানসিক সমস্যা যেখানে সমস্যা থেকে বের হয়ে আসা কোন সহজ নয়, মানুষের মনে এটি একটি রোগ।

(৪) হোমোসেক্সুয়ালিটি একটি স্বাভাবিক বৈশিষ্ট্য নয়।

2. ধ্বনিতাত্ত্বিক বৈশিষ্ট্য : —

১. প্রাচীন ভারতীয় আর্যভাষায় বিসর্গ যুক্তধ্বনি খুব কম্বুনে পরিণত হয়, মধ্য ভারতীয় আর্যভাষায় ~~[illegible]~~ সমীভূত হয়ে সমযুক্তধ্বনি সুক্ষ্ম যুক্তধ্বনে পরিণত হয়। যেমন - অর্থত > অত্থ, এই সুক্ষ্ম যুক্তধ্বনি-এর মধ্যে একটি লোপ দেখা যায় - অত্থ > অথ, এই লোপ-এর অতিসূরণ-এর ফলে একটি সুরধ্বনির আগমন ঘটে তার ফলে হয় - অথ > আথ, আবার কিছু কিছু সময় এর ব্যতিক্রম হয়। সুক্ষ্ম যুক্তধ্বনির মধ্যে একটি লোপ পায় কিন্তু কোনও সুরধ্বনির আগমন ঘটে না।

২. দুটি সুরধ্বনির মধ্যে 'য়' শ্রুতিধ্বনি বসে চলে আসে। যেমন - নিকটি > নিজড়ী > নিয়ড়ী নিয়ড়ি

বিষয় বিশ্লেষ আরম্ভ করেছিলেন, তার লেখা 'মুরোপ প্রমথ সাহিত্য' বিশ্লেষ প্রশংসনীয়, যিনি দেখে মুগ্ধ হয়ে যান যে প্রমথের রস আস্বাদন করেছেন এ সৃষ্টি সাহিত্য সৃষ্টিতে তোলেননি, প্রমথের সাথেও তিনি সাহিত্যের অনুষ্ঠানে এসে, ও তাদের বার বার ঘুরিয়ে দেখেন, এছাড়া তিনি বলে ও সাহিত্যিকদের মধ্যে বিশ্লেষণে নানা মতের আলোচনা হয়েছে যায়, 'বিশ্লেষণ' পত্রে প্রমথ বিশ্লেষণের কিছু বিশ্লেষণ হয়েছে, এছাড়া তিনি আরও অনেক কাজ করা যায় যে প্রমথ সাহিত্যে, মূল্য আছে, 'মুরোপ সাহিত্য' বিশ্লেষণে যদি বিশ্লেষণ হয়েছে

Class 2ND YEAR Roll No. 17/BSCH/229 Subject CEMA Paper III-B

8 a) To prove Hermitian operator produces Eigen values tha are real

Let Ψ be a ee square integrable eigen function and $\hat{A}$ b Hermitian operator and a be an eigen value

$$\hat{A}\Psi = a\Psi \quad (i)$$

$$\hat{A}^*\Psi^* = a^*\Psi^* \quad \text{(Complex conjugate)} \quad (ii)$$

Multiplying equation (i) with Ψ^* & equation (ii) with Ψ,

$$\int \Psi^* \hat{A}\Psi \, d\tau = a\int \Psi^*\Psi \, d\tau \quad (iii)$$

$$\int \Psi \hat{A}^*\Psi^* \, d\tau = a^*\int \Psi^*\Psi \, d\tau \quad (iv)$$

The left hand side equations of (iii) & (iv) are equal due Hermitian operator

$$\int \Psi^* \hat{A}\Psi \, d\tau = \int \Psi \hat{A}^*\Psi^* \, d\tau$$

So, $a\int \Psi^*\Psi \, d\tau = a^*\int \Psi^*\Psi \, d\tau$

$\therefore (a-a^*)\int \Psi^*\Psi \, d\tau = 0$

Since $\int \Psi^*\Psi \, d\tau \neq 0$ as Ψ & Ψ^* are square integrable e functions

So, $(a-a^*) = 0$

$\therefore a = a^*$

Thus, we can say that both a & a' are real in nature So, Hermitian operator produces Eigen values that are real

(9) (a) Hydroformylation reaction:-

The most important example of homogeneous catalysis is known as hydroformylation reaction in presence of co catalyst.

Hydroformylation reaction (usually known as oxo process) is used to describe the addition of H_2 and CO catalyst to form an aldehyde which contains one carbon more than that of the alkene in double bonded olefin in presence of co catalyst.

But this aldehyde is not the end product. The aldehyde again undergoes reduction to form alcohol.

Equivalent conductance of an electrolyte is defined as the conductance of a volume of solution containing one gm. weight of dissolved substance when placed between two parallel electrodes 1 cm apart & of large enough to contain between them the electrolyte solution.

S.I unit = $Sm^2 geq^{-1}$ $ohm^{-1} cm^2 geq^{-1}$

Cell constant -

It is the ratio of the distance between 2 electrodes to their area of cross section of the electrode

It is denoted by a^*

Expression $a^* = \frac{l}{A}$ (For a particular conductometric cell. l/A is constant)

What are the stages of critical reading? Mention and explain each stage briefly. 5 points

The stages of critical reading are:-
1) Pre-Reading- This stage includes previewing of the book, setting a purpose of why should we read the book, understanding the background of the text, building knowledge about the content of the text and what the book is centred around. Also, understanding of the characters of the book.
2) While Reading- While reading stage includes making notes, making annotations, re-reading, sub-vocalising which is reading certain portion aloud to oneself in order to remember, highlighting the key points, pacing, intensive reading i.e relating to examples and similarities, thinking of reference and cross-reference.
3) Post-Reading- It includes implementation of what we have read. After we have finished reading, we make a gist of the entire story, outline important points, summarise and analyse. Post reading, We revise and discuss about the book in order to get more insights and more undiscovered perspectives.

2) a) Constipation - Constipation is characterised by either incomplete evacuation of faeces daily or delayed evacuation of faeces one in 2 or 3 days. +1

b) Types - Constipation according to clinical practice can be categorised into 4 types. These are as follows

1) Colonic stasis or Atonic constipation
2) Rectal stasis or dyschezia
3) Irritable bolon syndrome or Spastic constipation
4) Intestinal disturbance: obstruction

1) Atonic Constipation - this is the most common type & it is often called the 'lazy bowel' because there is loss of muscle tone causing weak peristalsis. Therefore the desire to defecate occurs due to the entry of faeces that has been already accumulated in the pelvic colon and into the rectum. Therefore the movement of faeces from the pelvic colon to the rectum is caused by mass peristal movement of colon which is stimulated by the physical activities often after getting up in the morning due to consumption of fluid, water etc.

b) The Method of flavouring Liquors :-

There are three methods of flavouring liquors, such as -

i) Maceration :- In this method the flavouring agents are soaked in alcohol to capture the flavour. This process will go on for 24 hours - 1 year.

ii) Hot infusion or precolation :- In this method the alcohol spirit is circulated over the crushed flavouring agents and this process is repeated for several time to absorb the aroma.

iii) Distillation :- In this process the alcohol is vapourised and it is passed through the flavouring agents and the vapour is now cooled and condensed into liquid and the alcohol will absorb the flavour.

7) a) BMR → The metabolic rate of the body as determined when the person is at rest not doing any type of physical activities except breathing etc is called the basal metabolic rate or BMR.

The factors affecting BMR are as follows →

1) Age → Age is an important factor affecting the BMR. The BMR is high during childhood and it decreases with increasing age. Past 40 years, the BMR tends to decrease as the person is moving towards becoming old.

2) Gender → The BMR of a healthy and normal male is higher than that of a healthy female of the same age and under the same conditions. Gender is another important factor affecting BMR.

3) Blood pressure → Blood pressure also affects BMR of a person. High blood pressure increases BMR whether low blood pressure decreases the BMR. In other words, Blood pressure is directly proportional to BMR.

4) Caramelisation is a type of non-enzymatic browning reaction. That means, it causes the browning of food items without the action of enzymes. Caramelisation is done to make the food brown in colour. Caramelisation is done in sugar and milk products.

Crystallization :- In the process of crystallization, a closely packed molecules of crystal is arranged in a pattern. For crystallization, the solution should be supersaturated. The formation of crystals will depend on the rate of formation of nuclei around which the crystals grow and the formation of crystals around the nuclei. If the are or two nuclei are produced, very large crystals are formed, and if the nuclei formation is rapid, many small crystals are formed. The rate of formation of nuclei and crystals depend on a number of factors.

1) a) According to Sen's 'capability approach', poverty cannot only be measured according to the amount of commodities one possesses or the utility one derives from it. It should depend upon one's capability to function; one's abilities to use the commodities he owns. For example, a book is not of any use to an illiterate man. Thus the notion of poverty can also be described as 'capability failure' associated with the incapability to use whatever resources that is available.

b) The Production Possibility frontier of a consumer gives the various combination of two goods which an economy produces. The Pareto optimal point on a PPF is a point which shows the point beyond which the production of one commodity will lead to hampering or dampening of production of another commodity. i.e., to make one better off an economy needs to make worse off the other. This is known as trade off. The Opportunity Cost is the slope of the PPF. Opportunity Cost of Producing one commodity is the amount foregone to produce an extra unit of the other commodity. Thus Opportunity Cost is directly related with the trade off.

An economy produces those commodities where it has comparative advantage, i.e., the relative cost is less. The consumption

3/(a) The government plays several major roles in the economy. The three major functions of the government are, as follows:

i) Allocation: The government provides public goods by taxing the private good sector, but taxation leads to decrease in resources in the private good sector. Thus it can be said that more of public good means fall in private good. In other words provision of public goods leads to sacrifice of private goods. Thus the function of public ~~got~~ sector is to ascertain the proper allocation of resources between the public good sector and the private good sector. 2(a) Functions of Govt.:

The Government body has several functions towards the welfare of a nation, both economic & social. On the economic level the govt. has to intervene to ensure the ~~great~~ overall welfare of the nation state & all its occupants. The functions of the govt. body, especially the central body, can be categorized into the following three groups.

(1) Allocation function: Under this function, the central govt. has to undertake the duty of reallocating scarce resources in the country. As for any country resources of any kind [eg. human resources, natural resources, capital resources] are given or are scarce. Hence, if markets are to be allowed to operate freely the rich will get richer in respect of resources & the poor will get poorer. Therefore the function of the govt. is quite indispensable in to this aspect. The govt taxes the private sector, which acts as a form of withdrawl of resources from the private sector. Simultaneously, the govt. uses the resources to supply

We have resources in environment which helps us to produce goods which in turn is consumed. All the three things resources, production & consumption gives utility that is a positive amenity. This brings us to the first law of Thermodynamics : energy can neither be created nor be destroyed. The output is input of something & the cycle continues. Ans

1. Producer goods are those goods which are used for the production of other goods — either consumer good or producer good themselves. Examples- loans, machines, tools etc. Consumer goods can be defined as those which are used for final consumption. They satisfy the consumer demand directly. examples - prepared food, ready-made clothes, residential houses.

Producers good can be classified into two categories — consumable and durable. The examples of the former are— coal, oil etc :

4) The physical presence of pollution does not mean that environment pollution exists. Even if environment pollution exists it is unlikely to be the case that it should be eliminated. This proposition can be explained with the help of the following diagram.

Here, in the vertical axis we have taken cost and benefit and in the horizontal axis we have taken the level of economic activity by the polluter, ie, Q.

MNPB is the marginal net private benefit curve of the polluter. Polluters will incur cost while producing the polluting product and in return will receive benefit in the form of revenue. Thus, the difference between the revenue received and the cost incurred will give us the net private benefit. MNPB is the marginal of the net benefit, ie, the extra benefit received when the polluter changes his production by 1 unit.

9) Ans: Optimal level of Externality:

The existence of physical pollution doesnot mean economic pollution will exist. If 'economic pollution' exist it is unlikely of that it should be eliminated.

In the figure below the polluter's activity is measured by g^* in the horizontal axis. Costs and benefit is measured in the vertical axis. MNPB is the marginal net Private Benefit. Here Polluter is firm.

An Intuitive explanation will be possible. The polluter will Incure costs in undertaking the activity that happens to give rise in pollution and will receive benefit in terms of pollution. Here MEC is Marginal External Cost. ~~that means the extra~~ The difference between the revenue and cost is "private net benefit". That is extra net benefit due to change in the activity by one unit. ~~MNPB means~~ MEC means the extra ~~external cost due to~~ damage done by pollution arise from the the activity measured by g. It is shown here as rising with output g^*.

The abscissa records a value of 37.5 (≈ 38) while the ordinate records 67.5 (≈ 68).

It implies that 68 observations (Since no. of observations cannot be in decimal) are less than or equal to the value 37.5.

So

$$\frac{d_1}{D_1} = \frac{d_2}{D_2}$$

$$\Rightarrow \frac{64-60}{70-60} = \frac{z-112}{120-112}$$

$$\Rightarrow \frac{4}{10} = \frac{z-112}{8}$$

$$\Rightarrow \frac{32}{10} = z-112$$

2. Draw the graphs of cumulative frequencies for the frequency distribution given in table 4.23.

Find the value of the variable corresponding to the intersection of the two graphs and find the corresponding cumulative frequency? what is its implication?

Hence, The value of the variable corresponding to the intersection of two graphs is 36.2 (close to 40) and the corresponding frequency is 59.0 (close to 60)

The implication is that 59.0 observations are less than or equal to the value 36.2 i.e $(59 \leq 36.2)$.

3. In the same frequency distribution as mentioned in Q. 2 above find the number of observations between 49 and 64.

Ans:

Values	Cumulative frequency (c.f type)
0	0
10	4
20	16
30	40
40	76 ← y
49 → 50	96
60	112 ← z
64 → 70	120
80	125

We see, 49 lies between the value 40 and 50 in the first column, and hence the cumulative frequency (y) must lie between the corresponding cumulative frequencies 76 and 96 in the second column, as shown by the arrow mark. Applying formula, for finding y:

i.e. $d_1/D_1 = d_2/D_2$

or, $\frac{49-40}{50-40} = \frac{y-76}{96-76}$

or, $\frac{9}{10} = \frac{y-76}{20}$

or, $18 = y - 76$; or, $y = 94$

That is the cumulative frequency

Again, 64 lies between the value 60 and 70 and it's c.f (z) must lie between the corresponding c.f 112 and 120. Applying the formula as before;

$\frac{64-60}{70-60} = \frac{z-112}{120-112}$ or, $\frac{4}{10} = \frac{z-112}{8}$

or, $16 = 5z - 560$ or, $y = 115.2 = 115$ (approx)

Therefore the number of observation between 49 and 64 is

$z - y = 115 - 94 = 21$. (Ans)

Hence, the value of the variable corresponding to the intersection of the two graphs is 37 and the corresponding frequency (cumulative) is 62.

The implication is that 62 observations are less than or are equal to the value 37.

(3) In the same frequency distribution, as in Q2, find the no. of observations between 49 and 64.

Ans:

Value / Class boundary	c.f (< type)
0	0
10	4
20	16
30	40
40	76 ← y
49 → 50	96
60	112 ← z
64 → 70	120
80	125 = N

The required solution can be obtained by applying simple Interpolation in the cumulative frequency distribution.

∴ No. of observations between 49 and 64 = No. of obs. less than 64 - No. of obs. less than 49

= c.f corresponding to 64 - c.f corresponding to 49.

$$\Rightarrow 18 = y-76$$
$$\Rightarrow y = 76+18$$
$$\Rightarrow y = 94$$

and,

To find c.f z, we have,

$$\frac{64-60}{70-60} = \frac{z-112}{120-112}$$

$$\Rightarrow \frac{4}{10} = \frac{z-112}{8}$$

$$\Rightarrow 32 = 10z - 1120$$
$$\Rightarrow 10z = 1120+32$$
$$\Rightarrow 10z = 1152$$
$$\Rightarrow z = 115.2 \sim 115 \text{ (approx)}$$

The no. of observations between 49 and 64 is

Q:- Use complete steps to follow the algebraic definition of concavity and convexity to check whether the following functions are concave, convex, strictly concave, strictly convex or neither. $(4 \times 10) = (40)$

(a) $z = -x^2$

(b) $z = -xy$

(c) $z = x_1^2 + 2x_2^2$

(d) $z = 2x^2 - xy + y^2$

[10 marks for each sum.
2 marks for definition.
2 marks for method.
6 marks for solution through steps.]

Ans:- By algebraic definition, a differentiable function $f(x)$ is $\left\{\begin{matrix}\text{concave}\\ \text{convex}\end{matrix}\right\}$ iff, for any given distinct points u and v in the domain, such that $\left\{\begin{matrix}v<\\ v>\end{matrix}\right\} u$,

$$f(v) \left\{\begin{matrix}\leq\\ \geq\end{matrix}\right\} f(u) + f'(u)(v-u)$$

This definition is adaptable for strictly concave and strictly convex, by changing the weak inequalities $\leq$ and $\geq$ into strict inequalities $<$ and $>$ respectively.

Given function is $z = -x^2$.

Q. Use complete steps to follow the algebraic definition of concavity and convexity to check whether the following functions are convex, concave, strictly convex or neither.

a) $z = -x^2$.

Let $f(x) = z = -x^2$.

A differentiable function $f(x)$ is said to be {concave / convex} if, for any given points u and v in the domain,

$$f(v) \begin{cases} \leq \\ \geq \end{cases} f(u) + f'(u)(v-u) \quad - \text{eq(1)}$$ ✓

Here, LHS $= -v^2$. RHS $= -u^2 - 2u(v-u)$.

Subtracting the latter from the former, we get.

$$-v^2 + u^2 + 2u(v-u) = (v-u)\left(\frac{-v^2-u^2}{v-u} + 2v\right) \quad [\text{factoring}]$$

$$= (v-u)[-(v^2 - 2uv + 3u^2)]$$

$$= -(v-u)[(v-u)^2 + 2u^2]$$

$\therefore$ $v \neq u$, the sign of this expression must be negative

$\therefore$ eqn.(1) is strictly {inequality}, $z = -x^2$ is strictly concave.

Hence, it is strictly concave. ✓ 10

In the period a child undergoes physical development the organs in the body undergo changes. The sexual organs of the body develop during this period. Both boys and girls undergo physical change and due to this they feel little awkard and consider themselves different from other. They become little shy to talk with their opposite gender and gradually maintain distance from them. But as time passes they become accustom with their change and accept it. During this period of physical development in both girls and boys there is a growth of pubic haires.

1)a) Features of Buddhistic system of education :-

Buddha did not believe in ideal worship. He was of the view that one can reach to God through salvation and emancipation. By worshipping ideals or pictures man cannot reach to God. Through salvation Lord Buddha meant that a person has to sacrifice all the worldly pleasures in life. They have to lead a simple life and they have to practise meditation. Through meditation, learns of meditation may lead a person to reach God. A person also has to walk tender in life for attaining salvation. So, the (teachers) students of Lord Buddha turned in to monks and practised meditation for believing to attain salvation through emancipation. Sometimes the students practised habit of meditation even starving them and even gave up ideal worship. The people gave all the luxuries in life to lead a simple life and their main aim was to reach to God. The teacher student relationship would be like father and son and punishments should be given to students if they would not follow their Guru.

In 'Mid Summer Night's Dream' three distinctive unrelated worlds are combined together, the anachronistic court of Pre-Homeric Athens, the contempory English countryside and realm of fairy land are all put together in one and the same timeless moment to create a story of ~~No~~ magnificent grandure. In 'Mid Summer Night's Dream' the theme of love and the place of love are the main themes underlying the story and in this process the Pansy's filter plays an important role in putting together of the plot. The play is essentially a comedy, so the lives of the men in the story are as one finds it in real life and live in it their direct and dessent path. During the Elizabethan times, there was a close gathering of people and creatures were belived to have magical powers in them. Fairies and elves were thought to be real living in the same sphere as humans. Shakespear chooses the mid summer's night instead of the Eve of May ~~d~~ not due to coincidence but due to certain specific reasons. Both of these days were believed to have magical powers in them but the eve of May

3. "The Home and the World offers a polemical insight into the self-defeatist politics of Indian Nationalism."

- "Bāangalir Prān, Bāangalir Mon, Bāangalir ghore jeto bhai boon,
  Ek hauk, ek hauk, ek hauk, hey bhagobaan."
  — Rabindranath Tagore

Composed in the early half of the 20th century, the song 'Bāangalir pran, Bāangalir mon' aims to unit the masses in the freedom struggle of India. Tagore inculcates this 'idea of unity' very well within the content of his novel 'The Home and the World'. The novel pictures the freedom struggle of India and the chasms inherent in contemporary politics of the time. Tagore presents a polemical insight into the self-defeatist politics of Indian Nationalism.

2) The woman's quest for her identity is a very familiar theme in literature. Novels of Jane Austen and George Eliot comment on the social and political position of and the rights of women. This quest is further extended by the poem Introduction by Kamala Das which deals with women's sexual identity and needs.

This poem portrays the idea of a woman's struggle for self definition in a patriarchal society that is hostile to women empowerment. This we suggests the basic feminist philosophy that insists on giving serious attention

Ans:- William Wordsworth, being a nature lover believes that nature possesses all the senses, which humans have, be it passion, feelings, pain. He is one of the greatest Romantics known. He had a very strong memory power, which other people are incapable of producing. ~~Its~~ Tintern Abbey is actually the production of this memory of his. Wordsworth's other poems like The Solitary Reaper also has the same quality. In Tintern Abbey, we find his strong memory power, his unconditional love for nature and his closeness with Dorothy Wordsworth, his sister, whom we find to be one of the integral part of this poem. Not only with nature, Wordsworth also had a very fine relation with man. Its his concern for the mankind that leads him to appreciate and preserve nature. Greatest of all the Romantic poets Wordsworth secured a huge position, his verses were imaginative, with individuality, they were ~~seen~~ the break from the rules of the earlier period.

No doubt, that Tintern Abbey is one of his finest productions, with all main features of the Romantic period. This poem of Wordsworth records

1.a) "The Tyger" is a part of William Blake's Songs of Experience. Blake being from the Pre-Romantic era identified spiritualism and individualism in his poetry.

Symbolism is a method of constructing ideas through symbols and notations. It personifies, and by use of metaphores, the idea and is presented by the use of it in a literary work.

Blake in his poem 'The Tyger', as well as 'The Lamb', symbolises the varied existence of God in the world of the living. Blake's representation of Simplicity is through the presence of Him in the natural wild world.

"The Tyger", the title itself signifies the symbolic structure of the poem. The original and rightly used spelling of is 'tiger', but Blake did not use the rightly spelled word, he spelt with the use of 'y' rather than 'i' due to it's euphonic and along the way to know the painting of a Tyger leaping forth with it's fierce stance. "The Tyger" as an analysis cannot be presented alone it has to be compared and analysed along with it's counter part. 'The Lamb'. Both of these are compositions of Blake in the series of 'Songs of Innocence and Songs of Experience. "The Lamb" is a representa

15). In Jane Austen's "Pride and Prejudice", the chief character, Elizabeth Bennet is an unfailingly attractive person even in her most dull and blindest moments, known for her great wit and playful sense of humour. It is due to this intelligence and funny streak, she emerges to be the most favourite child of her father who pampers her. She is described as a beauty and especially praised for her expressive eyes but what everyone takes notice of is her independant and opinionated mind. Much of her self assurance comes from a keen critical mind which is expressed by quick yet spirited dialogues. She is always interesting to listen to and ever eager to laugh at foolishness. Due to her exceptional powers of observation, the sense of differente between wise and foolish according to her is best in the most past. It is her wise intellect and good sense of humour which catches Darcy's admiration and brings on Lady Catherine's disapproval.

1a) Define biosphere. Discuss about the components of biosphere. (2+5)

b) Briefly discuss the significance of ecotone. (3)

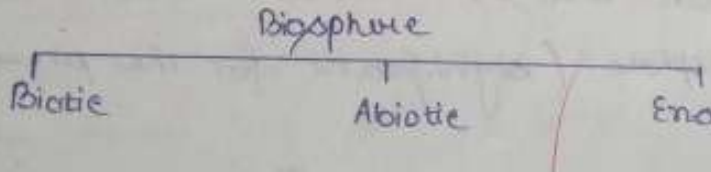

Biosphere:

1a) The term biosphere was first coined by German scientist Edward Suess in 1899. It is a layer that surrounds the earth making it possible for all living organisms to live. It is a irregular shaped relatively thin zone in which living organisms exist on or near the land surface and throughout its water surface. It extends upto 10 km above the surface and 9 km below. The upper extent of the atmosphere depends upon the availability of oxygen, moisture and temperature. Where as the depth can be upto the roots of large trees or hill where burrowing animals can survive or maybe till the presence of parent rock materials. The depth in oceans can be more as well. In biosphere there always exist an interrelation between the biotic and abiotic components or even in between the biotic components themselves.

महादेवी वर्मा छायावादी युग की प्रसिद्ध एवं सक्रिय कवियित्री रह चुकी। महादेवी की विरह - भावना के प्रति कुछ खास लगाव रहा। वह स्वयं यह कहती थी की एक दुख ही एकमात्र ऐसी डोर है, जो हमको जीवन से अलग तरह से जोड़ती है। महादेवी के जीवन में घटित हर एक पहलु को महादेवी ने विरह की वेदना के जरिए महसूस करने के साथ - साथ अपनी रचनाओं में भी व्यक्त किया। वह खुद को जीवन उस दुख की कड़ी से सदैव ही जोड़े रखती थी। क्रंदन के भावों को दुख के जरिए जागरूक करती

1) कबीर एक लोकप्रिय संत कवि थे। उनके जन्म स्थान व तारीख के विषय पर विद्वानों में मतभेद है। उनके विषय में जो भी ज्ञान प्राप्त होता है वह उनके कृतियों के संकेतों, समकालीन कवियों के रचनाओं में उनके उल्लेख द्वारा प्राप्त होता है। उनके माता पिता कौन थे, इस विषय पर भी मतभेद है। यह माना जाता है कि वे नीरू-नीमा नामक दो जुलाहों के पुत्र थे।

'बीजक' उनकी सर्वप्रथम कृति है। इसके अलावा उन्होंने दोहों की रचना भी की है।

उनकी भाषा 'सधुक्कड़ी' भाषा कही जाती है क्योंकि उन्होंने कई भाषाओं का मिश्रण करके - अवधी, ब्रज, खड़ीबोली, फ़ारसी, राजस्थानी, पंजाबी, आदि - अपनी रचनाओं का सृजन किया है।

कबीर ने अपने रचनाओं के द्वारा तत्कालीन सामाजिक परिस्थिति, धार्मिक परिस्थिति व लोकजीवन का चित्रण किया है, एवं,

* गद्यांश.

कमल को ..... कर रहे थे।

संदर्भ :- प्रस्तुत गद्यांश हमारी पाठ्य पुस्तक हिन्दी के 'सलाम' नामक कहानी से लिया गया है जो 'ओमप्रकाश' वाल्मिकी द्वारा रचा गया है।

व्याख्या :-

ओमप्रकाश वाल्मिकी द्वारा रचित सलाम देश में व्याप्त धार्मिक रूढ़िवाद पर आधार है कि किस प्रकार से देश में धार्मिक जातिवाद जैसी समस्याएँ व्याप्त है। इस कहानी का नायक हरिश है जो कि दलित वर्ग का है और पढ़ायी के लिए शहर गया हुआ रहता है उसकी शादी पक्की रहती है तो गांव आता है और उसके साथ उसका मित्र कमल उपाध्याय भी बरात में कर आता है। कमल जाति का ब्राह्मण है फिर भी वह दलित दोस्त हरिश की शादी में गांव में आता है क्योंकि वह धर्म, जाति आदि पर विश्वास को नहीं * मानता है।

→ हेतु का अर्थ है - कारण। हेतु का अभिप्राय होता है - कारण का कारण। कारण की कारण सामग्री कारण है। ऐसे दृष्टि से कहा जाता है जो कारण आदि को हेतु है। लक्षण से ही कोई वस्तु पहचानी नहीं होती है। अभ्यस्त की तरह कारण, किसी को बांधे रखता है या कोई भी कार्यकारी प्रक्रिया तथा निश्चित अनुक्रम द्वारा बनी हुई रचना है, उस प्रकार के प्रश्नों पर विचार ही काव्य हेतु कहा जाता है।

किसी में सम्बन्ध बातों के पीछे कोई - न - कोई हेतु या कारण होता है। साहित्य भी इस नियम का अपवाद नहीं है। साहित्य लिखना कि जीवन से घनिष्ठ सम्बन्ध है। बिना हेतु के अपनी सार्थकता प्रमाणित नहीं कर सकता। संस्कृत काव्यशास्त्र में काव्य हेतुओं का उल्लेख करने वाले आचार्यों में दण्डी, वामन तथा रुद्रट प्रमुख हैं। काव्य रचना की समर्थता प्रतिभा तत्त्व है या अभ्यास आदि। इस प्रकार के प्रश्नों का उत्तर भारतीय काव्यशास्त्र के अन्तर्गत काव्य-हेतु में प्राप्त होता है।

काव्य हेतु सम्बन्धी भारतीय दृष्टिकोण

भामह - आचार्य भामह ने काव्य रचना में प्रतिभा की महत्ता स्वीकार की है। उनका कहना है कि उसके उपदेश से शास्त्रों का अवगाहन तो कोई भी कर सकता है। अभ्यास द्वारा मन, मुख, जीभ तो बन सकता है किन्तु कवि नहीं। काव्य रचना तो प्रतिभा द्वारा ही सम्भव है। भामह का कथन इस प्रकार है -

"गुरूपदेशादध्येतुं शास्त्रं जडधियोऽप्यलम्।
काव्यं तु जायते जातु कस्यचित् प्रतिभावतः॥"

भामह के अनुसार हेतु का मूल काव्य प्रतिभा को माना है।

1 Motives behind the Geographical discovery by the western world.

A) There were many factors that urged the Europeans to discover new trade routes and new lands. The basic reason why Europeans made geographical discoveries was that "Europe was hungry", as has been remarked. Young men were hungry for adventure, whereas kings were hungry for conquest. However, thousands of Europeans in the crowded parts of Europe, were hungry for land as well as for gain. Thus these motives drove people out of Europe in search of new lands. The causes of geographical exploration are as follows:

• Fall of Constantinople → The trade route between the East and the west was through Constantinople and when in 1453 AD. the Ottoman Turks captured it, they closely closed the land route to the East and also indulged in looting the merchants As Europeans depended entirely upon the East for the supply of spices and other luxury goods, it necessitated them to

A new way of looking at literature (Introduction to Orientalism)

a Orientalism is a term used by art historians, literary and cultural scholars for the imitation or depiction of aspects of Middle Eastern, South Asian and East Asian cultures. Since the publication of Edward Said's 'Orientalism' in 1978, much academic discourse has begun to use the term 'Orientalism' to refer to a general patronizing Western attitude towards Middle Eastern, Asian and North African societies. In Said's analysis the West essentializes these societies as static and underdeveloped — thereby fabricating a view of Oriental Culture that can be studied, depicted and reproduced.

At first there were two major strands in the European interpretation of the Indian civilization which came to be known as Orientalism and Utilitarianism. These developed from the studies made by British officials working for the East India Company both as traders and administrators as well as Christian missionaries. They studied language like Sanskrit, Persian, Bengali etc. and encouraged translation of 'Dharma

Jean Jaques Rousseau was a French Political philosopher and a thinker. He mocked the dry rationalism of the philosophers. Rousseau played a very important role in the development of French Revolution which took place in 1789.

b) (A) The function $f(z)=u+iv$ is differentiable at a point $z_0 = x_0 + iy_0$.

Then $\lim_{z \to z_0} \frac{f(z)-f(z_0)}{z-z_0}$ exists for all approaching $z \in S$ to $z_0 = (x_0+iy_0) \in S$.

Now, $\lim_{z \to z_0} \frac{f(z)-f(z_0)}{z-z_0} = f'(z)$

$\Rightarrow f'(z) = \lim_{(x,y) \to (0,0)} \frac{u(x,y)+iv(x,y) - (u(x_0,y_0) - iv(x_0,y_0))}{x+iy-x_0-iy_0}$.

$= \lim_{(x,y) \to (0,0)} \frac{\{u(x,y)-u(x_0,y_0)\}+i\{v(x,y)-v(x_0,y_0)\}}{(x-x_0)+i(y-y_0)}$. ——①

Let us consider $z \to z_0$ along the line parallel to the real line. Then $y = y_0$ and $x \to x_0$.

$\therefore \lim_{x \to x_0}$ [illegible] then ① $\Rightarrow$

$\therefore f'(z) = \lim_{z \to x_0} \frac{\{u(x,y_0)-u(x_0,y_0)\}+i\{v(x,y_0)-v(x_0,y_0)\}}{(x-x_0)}$

Now, Since, $f'(z)$ exists, then, u_x and v_x must exist.

$\therefore f'(z) = u_x + iv_x$ [from (2)]

Name Baitika Bhowmick

Class 3rd year Roll No. 15/Group/Subject MATHS Paper X (Part-II)

Ans) A and B are respectively closed and compact subset of $\mathbb{R}$.

$\therefore$ B is a ~~compact~~ closed and bounded subset of $\mathbb{R}$ [$\because$ B is a closed compact subset of $\mathbb{R}$, by converse of Heine Borel's Theorem]

and BA is also a ~~compact~~ closed subset of $\mathbb{R}$.

$\because$ A is bounded subset of $\mathbb{R}$

$\therefore A \cap B$ is also a ~~compact~~ closed and bounded subset of $\mathbb{R}$

[$\because$ intersection of two closed set is closed]

This implies,

$A \cap B$ is a compact subset of $\mathbb{R}$ [By Heine Borel's theorem]

ii) Given, $f : [0,1] \to \mathbb{R}$ be defined by

$$f(x) = \begin{cases} 1 & , \text{if } x \text{ is rational} \\ 0 & , \text{if } x \text{ is irrational} \end{cases}$$

Let, $P = (x_0, x_1, \dots, x_n)$ be a partition of $[0,1]$

where $0 = x_0 < x_1 < \dots < x_n = 1$

Now, $V(P,f) = |f(x_1) - f(x_0)| + |f(x_2) - f(x_1)| + \dots + |f(x_n) - f(x$

Module - II

If $f: N \to N$ is defined as $f(n) = 4n - 2$ & $g(n) = n^2 + 2$. Find fog and gof

Soln:

Given that —

$f(n) = 4n - 2$

$g(n) = n^2 + 2$

[$\because f(n) = 4n - 2$, $g(n) = n^2 + 2$]

$fog = f[g(n)] = 4(n^2 + 2) - 2$

$= 4n^2 + 8 - 1$

$= 4n^2 + 7$

[$\because f(n) = 4n$, $g(n) = n^2$]

$gof = g[f(n)] = g(4n - 2)^2 + 2$

$= 16n^2 - 8n + 4 + 2$

$= 16n^2 - 8n + 6$

Hence $fog = 4n^2 + 7$

$gof = 16n^2 - 8n + 6$

Determine the stationary points of the function $2x^3 + y^2 - 3xy - 12y$ & identify the points.

2. 1st Isomorphism Theorem

Statement :- If G & G' are two groups & $\phi: G \to G'$ is onto homomorphism then $G/H \cong G'$. ($H = \text{Ker}\,\phi$)

Proof: H is a normal subgroup of G.

Now we take a mapping $\psi: G/H \to G'$ defined by $\psi(aH) = \phi(a)$, $a \in G/H$.

We have to show that ψ is well defined in sense that $aH = a'H$ then $\psi(aH) = \psi(a'H)$.

$aH = a'H \Rightarrow a^{-1}a' \in H$

$\Rightarrow \phi(a^{-1}a') = e_{G'}$, $e_{G'} \in G'$.

$\Rightarrow \{\phi(a)\}^{-1}\phi(a') = e_{G'}$

$\Rightarrow \phi(a') = \phi(a)$.

$\Rightarrow \psi(a'H) = \psi(aH)$.

Hence ψ is well defined.

$f'(x) = 3x^2 - 1$

$f'(x) > 0 \quad \forall x \in [1,2]$

$f(x)$ is ~~strictly~~ monotoning increasing on $[1,2]$.

একটি বচনের দুটি পদ — উদ্দেশ্য পদ এবং বিধেয় পদ। দুটি পদের কোনো একটি পদ অন্য পদটির অন্তর্ভুক্ত সমস্ত ব্যক্তিকে যখন বাদ দেয় তখন সেই পদটি হয় ব্যাপ্য, আর যে পদটির আংশিক বা সমস্ত বাচ্যার্থকে অন্তর্ভুক্ত করে, সেই পদটি হয় অব্যাপ্য। ব্যাপ্যতার দুটি নিয়ম হল — ১) আমাদের বচন উদ্দেশ্য পদকে ব্যাপ্য করে, এবং ২) বিশ্লেষ বচন বিধেয় পদকে ব্যাপ্য করে। যেমন, আমাদের বচন এবং বিশ্লেষ বচন - অর্থাৎ A, E, I এবং O — এই বচনগুলির প্রত্যেকটি করে উদাহরণ দেওয়া হল —

A বচন :— 'সকল আনুষ হয় মরণশীল' — এখানে 'আনুষ' উদ্দেশ্য পদটির আগে সকল কথাটি ব্যবহার করে আনুষ জাতির সমস্ত বাচ্যার্থকে স্বীকার করা হয়েছে, সুতরাং উদ্দেশ্য পদটি ব্যাপ্য। কিন্তু বিধেয় পদটি ব্যাপ্য নয়, কেননা মরণশীল জীব বলতে শুধু আনুষকে বোঝায় না, পশু, পাখি প্রভৃতি জীবই মরণশীল। এই পদটি আংশিক বাচ্যার্থকে গ্রহণ করেছে।

সুতরাং, 'A বচনের উদ্দেশ্য পদ ব্যাপ্য এবং বিধেয় পদ অব্যাপ্য।'

1 b) When a body is in thermal equilibrium, no force, acts on it.

$\vec{F} = 0$

$\therefore \vec{F}$ can be treated as sum of $\vec{F} = \vec{F}(a) + \vec{F}(c)$

where $\vec{F}(a)$ is the applied external force.

and $\vec{F}(c)$ is the force due to constrai

$\vec{F}(a) + \vec{F}(c) = 0$

$\therefore \sum_i [\vec{F}(a) + \vec{F}(c)] \cdot \delta\vec{r}_i = 0$

where $\delta\vec{r}_i$ is the virtual displacement

$$\therefore \boxed{\sum_i \vec{F}(a) \cdot \delta\vec{r}_i + \sum_i \vec{F}(c) \cdot \delta\vec{r}_i = 0}$$

Now as we know that work done due to constrain force is equal to 0

so $\boxed{\sum_i \vec{F}(a) \cdot \delta\vec{r}_i = 0}$ as $\sum_i \vec{F}(c) \cdot \delta$

i.e. when a particle is in mechanical equilibrium, no force acts on it, this is the Principle of virtual work.

If the Lagrangian is independent of a generalized coordinate. Or the Lagrangian does not depend on the general

Answer any **five(5)** *questions:* $5 \times 4 = 20$

1. The ground state energy of a linear harmonic oscillator is given by $\psi_0(x) = A_0 \exp\left(-\frac{\alpha^2 x^2}{2}\right)$, where α is a constant $\left(\alpha^2 = \frac{m\omega}{\hbar}\right)$.

(a) Plot the wave function.
(b) Find the normalisation constant A_0.
(c) Find the expectation value of the position of the oscillator.

2. Why neutral atoms are used in Stern Gerlach experiment? A collimated beam of neutral atoms is split up into seven equally spaced lines. What is the total angular momentum J of the atom ?

3. The electron in the hydrogen atom is in a state :

$$\psi(\vec{r}) = \sqrt{\tfrac{2}{7}}\psi_{100}(\vec{r}) - \tfrac{3}{\sqrt{14}}\psi_{210}(\vec{r}) + \tfrac{1}{\sqrt{14}}\psi_{322}(\vec{r})$$

(a) Determine expectation value of the energy in the state $\psi(\vec{r})$.
(b) Given $\hat{L}^2|\psi_{n\ell m}\rangle = \ell(\ell+1)\hbar^2|\psi_{n\ell m}\rangle$. Hence find the expectation value of $\hat{L}^2$ in the state $\psi(\vec{r})$.

4. What do you mean by zero point energy of a harmonic oscillator ? Calculate the zero point energy of a particle of mass 10g oscillating along the x-axis under the action of a force of restitution of 10^7 dynes/cm.

5. Write down the expression for the fine structure of hydrogen atom spectrum. What is the order of fine-structure correction in hydrogen atom ? What basis will you choose for calculating first order energy correction corresponding to the spin-orbit interaction ?

6. (a) Establish the relation $\left|\frac{\vec{\mu_l}}{\vec{p_l}}\right| = \frac{e}{2m}$ for the orbital motion of an atomic electron.
(b) Write down the spectral symbol of a state with $S = \frac{1}{2}$, $J = \frac{5}{2}$ and Lande-g factor 6/7.

7. The quantum numbers of two electrons in a two electron atom are:

$$\ell_1 = 3, S_1 = \tfrac{1}{2} \text{ and } \ell_2 = 2, S_2 = \tfrac{1}{2}$$

(i) Assume LS coupling and find the possible values of L and hence J.

(3) a) Positive and Negative rights.

The term rights came to be discussed from the American war of Independence, in 1776 and the French revolution in 1789. Right mean to get what is due to someone as an individual, citizen or a member of a group. Right means the power given to the people to vote, to contest election, to hold public offices etc. Though rights and obligation are not the same, but they are interrelated. When someone has a right to do something, others have an obligation to let you do it.

Rights are of 2 types :- Negative and positive rights.

Negative rights mean the sphere where the state is not permitted to enter and the State shall not be encroached upon.

Resolution of Online Parent-Teacher Meeting for SEM-4 and SEM-6 students held on 23.04.22

Parent-Teacher meeting for SEM-4 and SEM-6 students were held on 23.04.22 (Notification No. GMGC/ADMIN/21-22/ No. 421)as per resolution taken in the Departmental Meeting held on 22.04.22 (Notice No. Ref GMGC/ADMIN/21-22/No 385) which was given on the college website on 21.04.22. Most of the guardians were present on that day. They shared their opinions in front of us. All of them are satisfied about the theoretical classes but they worried about the examination procedure whether it will be held either in offline or online mode because number of offline classes were very less and syllabus was not completely finished at that time.

Sarkar had proposed a topic which could be dealt with by both the Semesters as Renaissance in Europe is an important topic for Sem 4 while Semester 6 has to study Bengal Renaissance.

In class a section of the students remain silent and do not participate in the interaction. Every faculty member thought paper presentation would help with team work, confidence building and competitive spirit.

Prasanta Kumar Pal 19/5/22.

1) Resolved that Metrix 1.3.1 of IQAC would be uploaded from Library Computer by Sanjukta De and supervised by Sarmila Sarkas as HOD so that all future queries could be dealt with by her.

2) The important issue of Student Progression was taken up in view of the impending end semester exams. Every faculty member mentioned a few names. It appears some students were habitual absentees from classes because of ill health or out station residence. The long term effects of online teaching during lockdown was also discussed. During lockdown, particularly 2020, two of our direct students lost a parent to Covid, most students and their family suffered from Covid. Classes had resumed according to normal schedule from Feb 3

2022, but the habits of students of Semester 3 and 1, who never experienced classroom teaching in college, needs correction.

It was decided that Faculty members would from time to time devote a period to Doubt - clearing session.

Guardians' Meet (twice, one online and one offline) had proved that some parents felt their students were unable to articulate their questions.

It was decided that Students would be asked to sit at different places every so often and back benchers would be asked to speak on isshes other than academic.

Sub. : Requirement of Guest Lecturers for Mathematics Department for the session 2019-20

Dear Madam,

It has been observed from the time table for the session 2019-20 that 68 classes per week have been allotted for the Mathematics Department to cover the whole syllabus. Presently, our Department has one Associate and three Assistant Professors (one of the Assistant Professors is expected to be elevated to Associate Professor soon). As per University norms, we are supposed to take 62 classes per week (60 in case of elevation of one Assistant Professor). In order to cover the balance 6/8 classes, I would request you to provide the Department with one/two Guest Lecturer(s) for 2019-20 session.

Hope you will consider my request favourably for the interest of the students.

Thanking you,

Yours faithfully,

The students reported that although they had spent a lot of time for maintaining Tutorial copies as advised by the Faculty members, no mark was added for this work which they learnt after publication of the result of Semester 1.

They also reported that that for Teaching Aid , they had to maintain a Lab Notebook as advised by the concerned faculty and very often, they had to repeat the work a number of times for neat presentation although the work is based on computer. However this effort also did not carry any marks.

So, for Semester 2, they are not willing to follow the existing procedure for Tutorials and Teaching Aid.

It has been decided that

- Problem sheet may be given in advance as in Semester 1 for Tutorials and the solutions will be discussed in the Tutorial class. No tutorial copy will be checked by the faculty.
- Several class tests may be conducted in the Tutorial class and the questions will be of MCQ / descriptive type
- From March, 2019 onwards atleast 2 Tutorials will be taken in both CC 3 and CC 4 by respective teachers
- From April, 2019 onwards class test questions for CC 3 and CC 4 will be set based on the portion covered by respective teachers for CC 3 and CC 4
- Since Teaching Aid (Graphical demonstration) is a part of a course, students will be advised to take it seriously. In this regard, Teachers' discretion is final.

Since we have not yet received any guidelines from the University regarding Tutorial , it was suggested by SB that like IITs we may give assignments to the students every week and students will submit them in a Practical Notebook which will be signed by the concerned teacher with date.

It was decided that we may follow this till we receive the guidelines from the University. It was also decided that in every alternate week CC-I & CC-II tutorials will be taken by the respective teachers.

Respected Ma'am,

We are the guardians of Akshee Gupta, third semester student from ASPV department. Being keen parents we have always attended the Guardians Meetings and were looking forward to meeting this time as well.

However, due to extreme waterlog around our residence as the consequence of erratic and torrential rainfall, we had to skip the meet.

Our sincere apologies for the absence and we assure to be present in the next meeting. Thank you very much for your cooperation.

Subject :- Apologising for the unfair means used in Part II Selection Examination 2018

Respected Mam,

With due respect, I beg to state that I Sreyashi Sen of CNDV 2nd Year has done a very wrong thing during the selection Examination. I wrote few lines on my left palm which was wrong and I seriously apologise for my behaviour.

I promise that I would not repeat this kind of behaviour in future or else college can take the necessary steps against it.

I will be highly obliged if you grant me to sit for the Calcutta University examination.

Thanking You
